

Md Mahfujul Hoque

01615867969 | mdmahfujulhoque123@gmail.com | [Portfolio](#) | [GitHub](#) | [Linkedin](#)

Fullstack Developer with **2+ years of professional experience** building scalable, responsive, and high-performance web applications using **React.js, Next.js, TypeScript, JavaScript, Node, Express, MongoDB, PostgreSQL**. Experienced in developing enterprise dashboards, restaurant management systems, POS solutions, RBAC, and e-commerce applications. Skilled in REST API integration, authentication, state management, performance optimization, and reusable component architecture. Passionate about writing clean, maintainable code and delivering exceptional user experiences.

Technical Skills

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3, Python

CS: DSA, OOP, SOLID, Design Patterns, System Design

Frontend: React.js, Next.js, Tailwind CSS, Bootstrap, Material UI, shadcn/ui, PrimeReact, Redux Toolkit, Zustand, TanStack Query, React Hook Form, Zod, Framer Motion, GSAP

Backend: Node.js, Express.js, MongoDB, PostgreSQL, REST APIs, JWT, Firebase, Resend, Nodemailer, Cloudinary, ImgBB

Tools: Git, GitHub, Postman, Figma, Vercel, Netlify, Render

Professional Experience

Frontend Developer | WezApps Limited

December -2025 - Present | Dhaka

[Saad's Kitchenette](#), [POS](#)

- Developed a scalable restaurant management platform from scratch using **Next.js, TypeScript, Tailwind CSS, and Node.js**.
- Designed and implemented a complete **Restaurant POS System** supporting dine-in, takeaway, and delivery workflows.
- Built a comprehensive **Admin Dashboard** with analytics, sales reports, and operational insights.
- Developed an **Inventory Management System** with stock tracking, product management, and inventory monitoring.
- Implemented **Role-Based Access Control (RBAC)** for Admin, Manager, Waiter, and other user roles with secure route protection.
- Built **Branch and Sub-Branch Management** modules, enabling centralized multi-location restaurant operations.
- Integrated RESTful APIs using **TanStack Query** and **Zustand**, enabling efficient server-state management, caching, and synchronization.
- Built reusable, responsive, and modular UI components, improving maintainability, scalability, and user experience across devices.
- Implemented secure **Phone OTP Authentication**, optimized application performance, and ensured a responsive experience across desktop, tablet, and mobile devices.

Frontend Developer (Contract) | Innovia Tech

June 2025 – November 2025 | Dhaka

[Al Ararfat Oasis](#)

- Developed responsive **e-commerce features** including shopping cart, coupon system, checkout flow, order management, and secure payment integration.
- Integrated RESTful APIs using **SWR** for efficient data fetching, caching, and automatic revalidation, ensuring a fast and seamless user experience.
- Built a **real-time order tracking system**, allowing customers to monitor delivery progress and view the live status of delivery personnel.

- Implemented **Role-Based Access Control (RBAC)** with protected routes and permission-based access for Admin, Customer, Delivery Personnel, and other user roles.
- Collaborated closely with backend developers to integrate production-ready APIs, handle authentication, and deliver scalable end-to-end features.

Frontend Developer | Software Innovations

April 2024 – October 2025 | Dhaka

- Developed modern web applications using React.js, Next.js, and TypeScript.
- Built reusable UI components and integrated REST APIs.
- Optimized application performance and resolved UI issues during pre-launch development.

Projects

Food Delivery System

Next.js • TypeScript • Zustand • TanStack Query • Node.js • Express.js • MongoDB • JWT

- Developed a scalable **Food Delivery Platform** from scratch using **Next.js, TypeScript, Tailwind CSS**, supporting three user roles: **Customer, Restaurant Owner, and Delivery Partner**.
- Built a complete customer ordering workflow, including **global food search, shopping cart, secure checkout, and both Cash on Delivery (COD) and Stripe payment integration**.
- Implemented **Role-Based Access Control (RBAC)** with protected routes and permission-based dashboards for Customers, Restaurant Owners, and Delivery Partners.
- Developed an intelligent delivery assignment system that notifies **nearby delivery partners (within a 5 km radius)** when an order is marked **Out for Delivery**, while allowing restaurant owners to monitor delivery status.
- Built a **real-time order tracking** feature with live map navigation, enabling delivery partners to navigate to customers and allowing customers to track their orders throughout the delivery process.
- Implemented a secure **OTP-based order verification** system, ensuring orders are confirmed only after successful delivery to the customer.

Real Estate Platform

Next.js • TypeScript • Redux Toolkit • Node.js • Express.js • MongoDB

Developed a responsive real estate platform featuring property buying, renting, authentication, Firebase Google Login, dashboard, property management, and REST API integration using reusable component architecture.
